BOBBI CHRISTINA DAUGHTER OF WHITNEY HOUSTON DIES AT 22 ON JULY 26 AFTER A LONG COMA OF 6 MONTHS

Paris, Los Angeles, 29.07.2015, 04:18 Time

USPA NEWS - Bobbie Khristina was the daughter of the famous American singer Whitney Houston and Bobbie Brown. She Passed away two days ago at 22 years old, after a long coma of more than 6 months. The release announcing her death said: "She finally rest in peace in the arms of the Lord"

The initial autopsy on Bobbi Kristina Brown released Monday showed she did not suffer significant injuries that caused her death. Brown, the daughter of the late Whitney Houston and Bobby Brown, was found unresponsive in a bathtub of her Georgia home on Jan. 31 and suffered irreversible brain damage, according to her family. The Fulton County Medical Examiner's office said subpoenas have been issued to help find more information about her death, and additional testing will be performed. The autopsy also did not find any medical conditions that might have contributed to the 22-year-old's death, according to the Fulton County Medical Examiner's office in Georgia. A death certificate will not be completed until "all test results are completed and all investigative, medical, and other documentary records are received and thoroughly reviewed," which could take several weeks, according to the medical examiner's office.

Fulton County District Attorney Paul Howard said the ultimately-fatal incident is still under investigation. Earlier, the medical examiner's office said in a statement that the nearly six months between the day Brown was found in the tub and her death "will complicate reconstruction of the events surrounding her initial unresponsiveness."

Bobbie Kristina was traumatized by the death of her mother, Withney Houston in 2012. Source: NBC
